W. Myers, Div. 4—\$142.50, \$335.04, and \$120.99.

C. M. Steele, Div. 5—\$352.75, \$241.90, and \$288.50.

Motion Carried.

Moved by Mr. Burrell that Council adjourn.

BY-LAW No. 32.

A By-Law of the Municipal District of Battle River No. 423 to authorize the expenditure of more than \$200.00 in the year 1931 for the purpose of purchasing a maintainer and grader.

Whereas it is necessary and expedient for the Municipal District of Battle River No. 423 to purchase a Maintainer and grader, and whereas the cost of the said Maintainer and Grader will require an expenditure of over \$200.00 in the year 1931. Therefore the Council of the Municipal District of Battle River No. 423 enacts as follows:

1. That it shall be lawful for the Council of the Municipal District of Battle River No. 423 and they are hereby authorized and empowered to make an expenditure of \$1275.00 in the year 1931 for the purpose of purchasing a maintainer and grader caused by the following terms,
1. 8 ft. Richardson Maintainer, price \$275.00—\$25.00 Nov. 1st, 1931.
\$125.00 Nov. 1st, 1932 and \$125.00 Nov. 1st, 1933. Interest 7 per cent. from Nov. 1st, 1931.

1. 8 ft. Richardson Grader, Price \$1,000.00: Credit for Stockland Grader \$200.00; \$200.00 Dec. 1st, 1931; \$200.00 Dec. 1st, 1932; \$200.00 Dec. 1st, 1933 and \$200.00 Dec. 1st, 1934. Interest 7 per cent. from Nov. 1st, 1931.

2. That the Reeve and Treasurer are hereby authorized and empowered to sign notes for the above amounts on behalf of the said Municipal District.

DONE AND PASSED IN COUNCIL, assembled this 11th day of June, A.D. 1931.

Signed: W. A. Burton, Reeve
R. J. Tate, Sec-Treas.

GOOD DEMAND FOR CANADIAN CATTLE

Prospects are bright for a continuance of the Canadian cattle trade with Britain for some months yet, with prices holding steady at a level with those paid for Irish cattle, according to reports received by the agricultural department of the Canadian National Railways.

Monday, when the Wainwright Constituency U.F.A. and U.F.W.A. will meet at the Camp Grounds at Wainwright Buffalo Park. Arrangements are being made for prominent speakers. A Basket picnic will be held at noon when coffee will be provided.

POOL ANNOUNCES PAYMENT 30 cts.

Calgary, July 13.—The Alberta Wheat Pool will make an initial payment of thirty cents a bushel, basis No. 1 northern at Vancouver, on deliveries from the 1931 crop, according to announcement made Monday by R. D. Purdy, general manager of the Alberta pool.

July 15th has been set as cut off date for the 1930-31 pool and subsequent deliveries will be taken on the 31-cent initial payment basis. This price list is subject to revision later depending on the general market situation.

First deliveries of last year's crop were paid for at the rate of sixty cents a bushel, as an initial payment, subsequent reductions carrying this down to fifty-five and later fifty cents a bushel.

The coarse grains pool which suspended operations last season will not be operative this year.

CENSUS OF MERCHANDISING

Reports from the Dominion Bureau of Statistics indicate that the first step in taking the Census of Merchandising and Service Establishments has been successful. The census enumerators have secured the names and addresses of merchants in every section of the Dominion.

In August the next step will be taken when a schedule will be mailed to each address taken by enumerators—the schedules varying with the type and size of business.

The widespread interest which is being taken in the merchandising census will insure the prompt and accurate completion and return of the Schedules. All types and sizes of merchandising and service establishments are realizing the importance and value of obtaining a comprehensive picture of distribution activities in Canada.

12-YEAR-OLD SCHOOL BOY TO EXPLORE ARCTIC ALONE

A twelve year old Chicago school boy, Hartley de Gerald, is going to explore Canada's Arctic wastes this summer alone. His only equipment for a 7,300 mile trip will be a camera and a diary.

The Canadian National Railways took the boy author and explorer as far as Edmonton, from which point he proceeded to Waterways, a small trading post on the Athabasca where he boarded a Hudson's Bay Company supply boat. His course takes him north on the Athabasca river, through Athabasca Lake, into Slave Lake and on up the river to Fitzgerald, another small trading post. Because of dangerous rapids on the Athabasca river, a sixteen-mile overland hike to Fort Smith will be necessary.

At the latter village another supply boat will take the lad northward again, through Great Slave Lake, then 1,100 miles up the McKenzie River to its mouth at the Arctic Ocean. Here he will spend several weeks with his camera and his diary. A glance at a map will give some idea of the extent of this young schoolboy's ambitious journey into Canada's far north. The byways of the globe have attracted this Chicago banker's son since the age of eight years when he first started his world travelling alone. Last year the lad discovered that the mythical Robinson Crusoe's Island could be seen by taking a cruise via the West Indies to British Guiana and thither he went, alone. He says it is a good way to learn geography.

FAMOUS CHAPLAIN RETURNING TO IRELAND

Father Dominic O'Connor, who was Chaplain to Terence MacSwiney, Lord Mayor of Cork, during his historic 74 day hunger strike in Brixton Prison, London in the year 1920, visited Jasper Park Lodge, enroute home to Ireland for the first time since he left his native land to minister to the spiritual needs of the Lord Mayor.

Father Dominic has been for ten years a missionary in the Baker City Diocese and has recently been Pastor at Bendon.

He is returning to Ireland to attend the election of the Superiors of the Congregation which will be held in Dublin in August. He travelled via Canadian National Railways to the West, and sailed from New York on July 11th.

CHURCH NOTICES AND ACTIVITIES

ANGELICAN CHURCH NOTICES
Owing to so many other sports taking place on July 15th, it was decided to postpone the Anglican picnic, but it was also decided that we as a body join in with the Legion picnic to be held on July 22nd at Steffinson's Lake.

The next W. A. meeting will be held at King's Park, Fabyan on July 28th, when it is hoped that any of the congregation who can, will join in with the Battle Heights picnic.

The W. A. propose holding a sale of home cooking and an afternoon tea on August 1st on Main St. Any donations will be very much appreciated. Watch the Irma Times next week for location.

UNITED CHURCH NOTICES

The services next Sunday will be at Passchendale, Roseberry and Irma at the usual hours.

The Boys' Camp is already in full swing on the site at Camp Lake, 10 and a half miles northwest of Kinsella. The girls will go into camp next Wednesday, July 22nd. The Rev. J. R. Gieson is away attending Boys' Camp and will also be present during the Girls' Camp. He will return however, for the Sunday services. There will be Visitors' Day at the Camps on Sundays, but only relatives of those attending camps are welcome. We have been requested to announce the Camp Grounds are private property, but special concession has kindly been made in order that our Young People's Work may benefit thereby.

The new Hymnal will be put into use at the Worship Service next Sunday. We feel sure that the use of this book of praise will be an inspiration to the members of the congregation. It is a comprehensive collection of hymns drawn from every branch of favorite hymns not to be found, yet all the great hymns are included together with well known favorite tunes.

VISIT YOUR EXPERIMENTAL STATION

An opportunity to see, know and believe results in agricultural experiments is the advantage of every Canadian citizen who uses the privilege of a guided visit through a Dominion Experimental Farm.

While individuals are always welcome, it is not humanly possible to properly serve many visitors coming singly. The way to come is with an organized party. It may be a community group, a part of an agricultural society, or any other rural organization. Thirty to one hundred adults make a convenient group. A large crowd becomes scattered and cannot be addressed in a feasible way. A few arrangements are necessary.

The superintendent will gladly arrange a date when he and adequate staff can be in attendance. It is preferable to bring a lunch and have a social picnic on the grounds. Be prepared to ask questions freely. A receptive frame of mind will prove a valuable asset in order to absorb the information which will be your opportunity to receive.

Twelve to fifteen organized parties usually visit the Scott Experimental Station during part of the summer months every year—usually during July and early August. The party is conducted through the departments of the Farm by the person in charge of the work. Ladies usually divide their time between flowers, garden and poultry. While the men spend most of their time examining field experiments and live stock. A competition with suitable prizes is arranged whereby the men estimate yields of grain from certain experiments and the ladies show their ability to tell names of flowers after an explanatory tour over the beds and borders. These competitions are conducted for organized parties and not for individuals.

Ask any person who has been a member of a party visiting an experimental farm if the trip was worth while? Progressive farmers usually have the habit of visiting their experimental station. Certain rural organizations have chosen a visit to their experimental station as their annual outing and as the Secretary of Paynton Agricultural Society said, "We always look forward to it with much pleasure."

WEEKLY REVIEW PROV. MARKETS

BEEF—On the Edmonton market a firmer tone has been noted and prices have moved upwards. Choice heavy steers \$5.50@\$5.75; choice light \$6@\$6.25; good \$5.75@\$6; medium \$5@\$5.25, and comm'n \$4@\$4.50. Choice heifers brought from \$5.50@\$6, while good ones made \$5@\$5.25.

FEEDERS, STOCKERS—Demand in this section of the market has been fair, with feeder steers selling at \$3.25@\$4; stock steers \$3@\$3.75; stock heifers \$3@\$3.75 and stock cows \$2.50@\$3.25.

HOGS—At Edmonton best offerings sold at \$8.10@\$8.25 which is higher than last week. Steers brought \$8.60@\$8.75 and butchers \$7.60@\$7.75, fed and watered.

SHEEP—Quotations on the Edmonton market for the past week were: Yearlings \$5@\$5.50; ewes \$3@\$4 and the lambs from \$7@\$7.50.

POLTRY—Receipts on light order, but prices have not advanced as market is dull. Very few orders being received. Broilers in fair shape, but hens are thin. Broilers, over 2 lbs., 14c; No. 1 under 2 lbs., 10c; No. 1 fowl, over 4 lbs., 9@10c; No. 1, under 4 lbs., 7@8c; No. 2, 5@6c. Roosters, 5c.

EGGS—Supply very light, while moderately active demand prevails. Quality not very good owing to hot weather. Very few direct shipments being made from producer to consumer. Prices steady, with extras, 15@16c; firsts at 13@14c and seconds 9@11c.

SIXTH FORTNIGHTLY CROP REPORT

(Issued by the Dept. of Agriculture, Province of Alberta, Edmonton, July 11th, 1931.)

According to telegraphic reports received by the Department of Agriculture on Friday, rain has been fairly general over most of the Province during the past ten days. In some districts there was as much as eight inches in the month of June. The dry weather of the Spring caused the early sown grain to head with short straw and rather thin stand. Later seedings are standing well, and all crops have greatly improved with the recent rains and warm growing weather.

In parts of the South and south-eastern central districts the heavy winds and dry weather during the month of May caused serious damage, so that the wheat in these areas will be a light crop. In the districts west and east of Edmonton to the Saskatchewan border and through the northeastern area the crops show a heavy stand. From present prospects it would appear that this district will have one of the heaviest crops it has yet produced.

Good conditions exist through the north-western section. Crops north of the Peace show strong growth with about 30 per cent in head. South of the river more rain is needed, though nothing is suffering at present.

Grasshoppers have been active in small districts in Southern Alberta. The damage has not been extensive to date, owing to the fact that control measures have been adopted by the use of poison bait. Cutworms have done some damage in scattered areas. Alfalfa cutting is under way in the irrigated districts of Southern Alberta and is a very excellent stand. The hay crop generally will not be large. From prospects, however, there will be plenty of feed for livestock. The general crop prospect can be considered very fair.

U.F.A. AND U.F.W.A. CONVENTION

The convention of the Wainwright U. F. A. and U. F. W. A. Constituency Association is to be held in Wainwright Buffalo Park on Monday, July 20th commencing at 10 a.m. Special speaker will be the Hon. Mr. McPherson or the Hon. Mr. Lymburn.

Basket Picnic at noon, coffee provided. Come and have a good time.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

Wedding Bells

LUNDEBERG—LARSEN

A very pretty wedding was solemnized on Wednesday, July 8th, when Inez Lundeborg, daughter of Mr. and Mrs. A. Lundeborg, of Viking district, became the bride of Mr. Ottar Larsen, of Kinsella. The nuptial knot was tied by Rev. S. Adolph Carlson, of Killam. The bride was attended by Miss S. Agriid Oshak, while the groom was supported by his brother Mr. Sverre Larsen.

In the evening a dance was held in the Overleigh School which was largely attended by friends and relatives of the newlyweds. The popularity of the happy couple was manifest by the many good wishes for a long and happy life that were extended by all, in which the community in general joins.

BEEF COUNCIL

AIDS PRODUCERS

Gratifying results have attended the efforts of the Council of Western Beef Producers, according to Jack Byers, secretary-manager, of Calgary. Although only formed on April 1st, the Council has already been able to establish weekly shipments of beef cattle to the British market and has secured an allocation of ocean space that will permit of continuous movement throughout the year.

Beef producers to the number of 800 have become actively interested in the Council, and their holdings represent some 250,000 head of stock. The Council of Western Beef Producers was formed for the sole purpose of promoting the interests of those engaged in the Beef Cattle Industry, and the manner in which the marketing problem has been attacked is a promising indication of the success that will attend other endeavours to be undertaken later. For this year however, the activities of this body will be confined to marketing problems.

Rod Macleay of High River, Alberta, is chairman of the Council, and George Ross of Milk River the other Alberta representatives. The Western Alberta Cattle and Horse Raisers Association represent Saskatchewan, and R. H. Helmer of Nicola and W. McMoran of Chilcotin represent British Columbia.

Producers desiring further information concerning the aims and work of the Council should write the Secretary-Treasurer, 5 Central Building, Calgary, Alberta.

ANNUAL CHURCH PARADE

The Irma brethren have accepted an invitation from the Wainwright Lodge to attend their Church Parade on Sunday, July 19th. The Lodges will meet at the Masonic Hall, Wainwright at 2.30 p.m. and parade to the Elsie Theatre for Divine Service at 3 p.m. R. W. Bro. The Rev. W. S. Brooker, Grand Lodge Chaplain for Alexander County and W. Bro. the Rev. A. M. Trendell, County Chaplain will conduct the service.

PUBLIC PICNIC

A Public Picnic under the auspices of the Irma Branch Canadian Legion B. E. S. L. will be held at Steffinson's Lake on Wednesday, July 22nd at 1.30 p.m. A full afternoon of sports and amusements for every one. Ladies kindly bring eats. Booth on Grounds.

NOTICE

A Bay Mare, Mack stocking legs, white strip down face, branded right shoulder—K with bar below, is impounded by H. E. Jeffery, Poundkeeper, R. R. 4 Edmonton.

The owner of this animal should immediately get into communication with the above named Poundkeeper.

B. H. Green, Sec-Treas.

Lessons Of The Depression

During periods of depression such as the world is at present experiencing the almost universal tendency is to look upon the gloomy side of things to the exclusion of everything that is hopeful and encouraging. As a result there has been a plethora of dire forebodings, headshakings, and pessimistic utterances, accompanied by an arid scarcity of optimism and hopefulness. People generally can see, and seeing things continually, dwell upon, the darkness, the losses, everything that is bad in the present situation, but it is rare indeed, to discover any one who finds something good, or prophetic of future good, arising out of existing conditions.

Yet nothing is wholly bad and there may, and often does, develop out of the most adverse circumstances some of the best and finest things of life. We have observed, for example, a larger sympathy on the part of the average person for their less fortunate fellow-citizen than has been noticeable for a long time. Fewer people are inclined to turn a deaf ear to stories of distress or to appeals for help. The man out of work is not, as a rule, ruthlessly turned away but is received kindly and sympathetically even though it may not be possible to do much or anything for him. Thousands who have little to spare are nevertheless dividing that little with those who have nothing. There is, we believe, less hardness and more sympathy in our relations one with another as a result of an appreciation of existing conditions and problems. The development of such a feeling is so much gain.

It is also true, or at least we are inclined so to believe, that many people are beginning to realize the true inwardness of life—that work, about which in times past they have been inclined to grumble and regard with distaste and as something they would like to avoid, is, after all, one of the greatest blessings conferred upon man by the all-wise Creator of the universe. Today, employment, the opportunity to work, is regarded by nearly everybody as one of the greatest boons they can obtain. Idleness is not a luxury, it is not to be desired; it is a heartbreak, a calamity. The compelling necessity to work has been found to be not a hard taskmaster, but a kindly benefactor. The hardest work of all is not to be able to work.

Another much needed lesson which some of us are learning is how puny mere man is after all. In days of prosperity and mighty mechanical achievement and progress, there was a growing inclination to regard ourselves as self-sufficient, as supermen, boastful and vain. And this individualistic self-sufficiency was reflected in national self-sufficiency. We could live unto ourselves alone, at least so we thought, and on our own lives and dis regard the rest of the world. But we have discovered we are not supermen, nor gods. The rains cease to fall, blighting winds blow and intense heat prevails, and mere man finds himself helpless. He can do nothing. His accumulated savings are soon eaten up. He is in distress, and his condition of distress reacts upon other people and nations thousands of miles away, just as their misfortunes and losses react upon him. One suffers, all suffer. Mankind is a brotherhood, and there is one ruling Power over all. These are truths which cannot be denied or ignored.

Prodigy Finishes Up At Adding Machine

Brooklyn Boy Shumps After Unusually Brilliant Start

This is the time of year when the college graduate goes forth to conquer the world. And yet William J. Sidis at the age of six months knew the alphabet. When he was but two years old he could read and write with ease, spell correctly and carry on an intelligent conversation. By the time he was four he had mastered four languages. At six years of age he completed an entire eight-year grammar school course in six months, and two years later he was graduated from the Brooklyn High School after completing the four-year course in half a year. Entering Harvard University at the age of 11 he was graduated with honors four years later. Sidis then took post-graduate work and became a teacher of mathematics. This boy wonder—says John Hix, in his Strange As It Seems Illustrations—was discovered five years later running an adding machine in a New York store.

Reduction In Colds
A ten per cent. reduction in frequency of colds among a group of 14 Cornell women students is the latest record of using scientific knowledge. Seventy-five Cornell men taking the same treatment showed a reduction of 42 per cent. The cold protection is ultra-violet light, alkali, diet, ventilation and sleep.

Could Not Check the Summer Complaint A Few Doses Did It

Mrs. B. Coulter, 918-11th Ave. E., Calgary, Alta., writes: "Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharge checked, so I went to the druggist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry, and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and in was not long before he was well again."

Drought Decimates Ducks

Dry Year Takes Heavy Toll Of Young Broods

The death rate among young wild ducks in Saskatchewan this year, owing to the drought, has been extremely heavy, was the opinion expressed recently at a special meeting called between members of the Saskatchewan Fish and Game Protective Association, Arthur Etter, game guardian, of Saskatoon, and Dr. W. B. Bell, of the Bureau of Biological Survey, Washington, D.C.

The extreme seriousness of the situation could not be stressed too much, was the unanimous opinion, and the sportsmen want the shooting season greatly curtailed if the United States will do likewise.

Dr. Bell said he had come to Saskatchewan because of the alarming reports received by his department. The department had not been sure that the reports had not been exaggerated and had decided to investigate for itself. "And I can assure you," declared Dr. Bell, "the reports have not been exaggerated. Mr. Etter and I have just finished a 500-mile trip and have counted exactly 400 ducks and of this number only 21 were young ones. On one lake we counted 320 ducks and there were no young ones amongst them. We believe that the adult ducks, had gathered after their broods on a number of small sloughs had died owing to the drought."

Mr. Etter stressed that the trip had been a very thorough one from the duck investigation standpoint. At every point touched very full enquiries had been made among sportsmen and farmers and they had declared that the death rate had been extremely heavy. It was doubtful if one per cent. of the young duck population in a great portion of the province had survived the drought.

Canadian Mines Pay Dividends

Several British Columbia Companies Distribute Substantial Sums

All mines are not just holes in the ground into which suckers drop their money. Despite talk of hard times and low-priced metal markets, Canadian mines are still paying steady dividends.

Several British Columbia companies are to pay out their usual quarterly dividends. Some of them amount to quite substantial sums.

Premier Gold will pay out \$150,000. Howe Sound (which operates the Britannia Mine) will pay out \$240,000.

Consolidated Mining and Smelting (which operates the Sullivan Mine and the Trail Smelter) will pay out \$630,000.

Sir Donald Mann tells us of declining to buy the Sullivan when it was offered to him by the original town-headed Sullivan for \$12,000. Since then it has had spells of good luck when lead and zinc were high, when it made \$60,000 a day.

The day may not be very far distant, when the great pre-Cambrian shield which blankets northern Saskatchewan, will be supporting big mines and paying out millions in quarterly dividends.—Regina Daily Star.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

Bible Weighs Half A Ton

Los Angeles Carpenter Has Completed Largest Copy In World

For two years Louis Wayne, a Los Angeles carpenter, has been working day and night to make the largest Bible in the world. Now he has completed his task. Using a hand-stamping machine, Wayne stamped on to the 34 pages of his giant book every single letter, symbol, and punctuation mark, making his family Bible as a pattern. The book contains 8,048 pages and weighs 1,094 pounds, and it spreads to a width of eight feet and two inches.

Made Poor Guess

"The place will never amount to a hill of beans." This was the prediction of Sergeant Joseph Herbert 65 years ago to Winnipeg's future. He gave away the land the Crown granted him, and marched east with the Royal Canadian Rifles when that regiment was recalled to Halifax. Recently a son of the sergeant of Red River days visited the city. The parcel of land his father gave away is now the site of the City Hall.

Fuel alcohol is made from pine-apple waste in a plant near Honolulu, H.I.

Weekly Newspaper Association

S. J. Dorman, of Alameda, Is Elected President For Coming Year

S. J. Dorman, Alameda, Sask., becomes the president of the Canadian Weekly Newspapers' association for the ensuing year, as the result of the election of officers, held in the Hotel Saskatchewan, Regina, at the recent convention. As a consequence, Malcolm MacBeth, retiring president, becomes past president; A. W. Marsh, Amherstburg, Ont., first vice-president, and E. Roy Sales is re-elected to the position of managing-director.

Directors elected were: Maritimes—H. S. Anslow, Windsor; H. B. Anslow, Campbellton; Don Fraser, New Glasgow; Quebec—C. E. Labranché, Three Rivers; Adair Selar, Huntingdon; P. E. Rioux, Drummondville; Ontario—J. A. MacLaren, Barrie; Lorne Eddy, St. Mary's; D. Williams, Collingwood; G. Lake, Timmins; Col. A. Macdonald, Alexandria; G. Chambers, Brampton; Elgin Harris, Burlington; R. Lancaster, M.L.A., Havelock; Manitoba—J. Cowie, Carberry; L. J. Bennett, Carman; Saskatchewan—Cameron McIntosh, M.P., North Battleford; S. N. Wynn, Yorkton; Donald Dunbar, Estevan; S. R. Moore, Swift Current; Alberta—New Turnbull, Red Deer; Herb. McCrea, Hanna; British Columbia—C. A. Barber, Chilliwack; Ralph White, Kamloops.

Considering exercises of the convention were marked by resolutions of thanks to the city, the railway companies and the public citizens that contributed towards "one of the finest associations in the history of the association."

Recipes For This Week

(By Betty Barclay)

SPANISH SALAD

(Serves 6.)

- 2 large tomatoes,
- 2 green peppers,
- 2 oranges,
- 1 tablespoon minced onion.

Cut each tomato into 3 slices. Take seeds from green peppers and cut each one into 3 rings. Peel oranges and cut in small pieces. On each salad plate arrange tomato slice topped with pepper rings. Fill center of ring with orange. Add minced onion to French dressing. Pour over salad.

MEAT PIES WITH RICE

Four cups cooked rice, 1 onion, 2 cups tomatoes, 1/2 teaspoon salt, 1/2 teaspoon pepper, 1 tablespoon fat, 1 pound raw meat or left-over meat cut up small. Melt the fat, add the sliced onion and if raw meat is used, add and stir until the red color disappears. Add the tomato and seasoning after the onion is browned, and heat through. Grease a baking dish, put in a layer of rice, add the meat and gravy and cover with the rice dotted with fat. Bake for half an hour.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Believes Amundsen Is Alive

General Umberto Nobile, Italian explorer, who commanded the dirigible, Italia, was aboard the Russian ice-breaker, "Malignin," when she sailed for Archangel, July 15, for an expedition into the far north. He hopes that he may find Roald Amundsen, the man of the Italia expedition.

An Accomplished Linguist

Lieut.-Gen. Sir W. Edmund Ironside, who has just been appointed commander-in-chief of the Forces in London, can speak at least a dozen Oriental languages. He is six feet four inches tall, and was commander-in-chief of the Allied Forces in Archangel, Russia, in 1918-1919.

Fastest Atlantic Crossing

Empress of Britain Sets New Record In Mercantile Marine of Any Country

Making the fastest trans-Atlantic crossing ever recorded by the mercantile marine of any country, the new 42,500 ton Canadian Pacific liner Empress of Britain at 3.15 a.m., Monday, June 22nd, recaptured the Blue Riband of the Atlantic for British shipping. Establishing a new world's record of four days, twelve hours and thirty minutes between Cherbourg and Father Point, mails were landed and the pilot taken on, in four hours and twenty-six minutes better time than the previous record of four days, seventeen hours and six minutes made between Cherbourg and Ambrose Light where pilots are taken aboard New York bound ships. The Canadian Pacific now holds the Blue Riband on both the Atlantic and the Pacific oceans, the Empress of Japan holding the record for the run from Vancouver to Yokohama.

B.C. Timber Resources

Industry Gives Steady Employment To 45,000 Men

Average annual revenue received by the Crown from forest sources in British Columbia during the past ten years, according to an official report, has been in excess of \$3,725,000, average value of materials produced has been more than \$80,000,000, and during this time the industry has given steady employment to about 45,000 men.

It is estimated that there are at present in British Columbia commercial stands of timber covering about 16,900,000 acres. Of the more important commercial species the amount of timber accessible for immediate future use is approximately as follows: Douglas Fir, 54,000,000 board feet; Western Hemlock, 61,000,000 board feet; Western Red Cedar, 60,000,000 board feet; Spruce, 70,000,000 board feet.

Use Empire Timber

London County Council Favors Use Of Home-Grown Article

The use of home-grown or empire timber only in the manufacture of furniture for the London County Council, provided supplies of such timber of suitable quality are obtainable at reasonable prices was recommended by the council's general purposes committee which has been studying the question of policy regarding the use of empire timber for the council's requirements.

The Canadian Chamber of Commerce in Great Britain has forwarded a resolution appreciating the decision to the council.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

The reason so many people miss the road to happiness is because when they come to it it looks so much like a detour they take the better-looking side.

Science is still trying to find out when and where farming was first attempted in ancient America.

UNIVERSITY OF MANITOBA

WINNIPEG

Offers, among others, the following courses leading to the degree of M.D. and C.M.: Through its FACULTY OF ARTS AND SCIENCE, courses leading to the degrees of B.A. and M.A., and B.Sc. including B.Sc. (Phar.), and M.Sc. Through its FACULTY OF ENGINEERING, courses leading to the degrees of B.Sc. (E.E.), B.Sc. (E.C.E.), M.Sc. and Ph.D. Through its FACULTY OF MEDICINE, courses leading to the degree of M.D. and C.M. Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS, courses leading to the degrees of B.Sc. and M.Sc. (H.E.). Through its FACULTY OF LAW, courses leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

Decrease In Forest Fires

Decided Drop In Prince Albert District This Year

A decided drop in the number of forest fires in the district is very noticeable compared to last year. The number totals 60, spreading over a district including the Prince Albert area west to the Big River forest reserve and east to Nipawin. Last year at this time there were 60 fires in the Nisbet reserve alone.

A reason given for the present low average in fires is the rewards offered for information leading to the arrest and conviction of persons wilfully starting fires. In addition to this, the campaign against forest fires is bringing good results, also the radio telegraph in operation enables the rangers to keep in touch with each other as to conditions.

The co-operation of the public is asked to enable the forestry officials to retain this high standard throughout the dry season when tourist traffic is general.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colds, and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

London Still In Lead

Population Exceeds New York By Over Million

London still is the world's largest city by a margin of more than a million inhabitants over New York. Metropolitan London, containing the "outer ring," which corresponds to that known as Greater New York, has a population of 8,202,818, preliminary summations of the census taken April 26 indicate. The population of Greater New York in the last United States census was 6,981,917, or 1,220,901 less than its British rival.

Horace Luck, 80, one of the last postmen who blew a bugle when delivering letters in London, England, is dead.

Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,300,000 cattle hides taken off last year in Canada showed unmistakable evidence of damage by warble fly grubs and the value of the finished leather produced from these hides was reduced by at least \$700,000. The extent of the additional loss in reduced milk and beef production cannot be determined, but it is probably equal to, or greater than, the direct damage to hides and leather.

According to Dr. W. E. Graham, of the National Research Laboratories, Ottawa, who secured this information from Canadian packers and tanners in connection with the leather research programme on which he is engaged, 15 per cent of all hides taken off in 1930 had open grub holes. Damage is most serious during the first six months of the year,

"Through buying hides in the fall to avoid open grub holes, tanners encounter considerable loss through interest charges on capital tied up in long periods, a loss which we cannot estimate.

The existence of grub holes in hides is, in addition to monetary losses involved, a potential source of annoyance and ill feeling due to difficulties in arriving at a proper estimate of an allowance for grubs.

"It is felt that under the present system of marketing in Canada the farmer has not come to realize fully the difference in value between 'grubby' and 'clear' hides. All Canadian hides sell for less because of the warble damage. In the British Hide Markets during 1930 a classification for warbled hides was introduced and as a result warbled hides

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 13 1/2 inches long.

when some tanners refuse to buy Canadian hides. In April and May, 1930, the percentage of hides that were 'grubby' ran as high as 45 or 50 per cent. Dr. Graham states that more grubby hides are found on western range stock than on other cattle and that the percentage is 10 per cent greater on steers than on cows. One tanner gave his opinion that 95 per cent. of Canadian hides showed the unsightly scars of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gutlet and eventually out through the animal's back. They leave holes which gradually close but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been ridged by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

That the problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw, at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly far they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a matter.

Farmers are recommended to seek advice as to treatment from recognized authorities. Dr. Graham's report concludes as follows:

"How strangely they play." "Yes. They are exhibition dancers, and they practice while they play tennis."—Der Brummer, Berlin.

W. N. 11, 1898

Praise For Livestock From Saskatchewan

If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Waldron, markets commissioner of the province, from the Co-Operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, she need have no doubts as to satisfactory prices; even on low value markets they would command the highest prices available," the letter received by the commissioner states.

Conjecture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of concern.

A more strict interpretation by Saskatchewan livestock breeders of export cattle is looked upon by Commissioner Waldron as the likely cause for the general good quality stock shipped.

"The last shipment of cattle received per the S.S. Manchester City was about the best ever received from Canada and has done more good in two days than a whole year of poster advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates. "The prices realized on the selected of this shipment were equal to our selected Norfolk cattle," it continued.

"Our markets will be favorable for another six weeks until the Irish grass fed cattle arrive, although even then your selected steers (young finished) will always be in good demand at top market prices," the letter concluded.

Being Afraid Wastes Time

Hours Spent In Worrying Could Be Used To Better Advantage

J. R. Lumley, editor of the Fort William, Ont., Times-Journal, says: "Did you ever stop to think that a lot of good time is wasted over being afraid? Hardly any movement forward has ever been made without someone else spending time in worrying lest it should hurt him."

"We all know how the retail merchant has been scared almost to death of the advent of the chain store. Yet when it has come, what a lot of merchants have simply plucked up their courage, brightened up their business methods, done a lot more good advertising and found that the chain store that had opened next door had actually helped rather than hurt them."

"The railway is afraid of the bus line, the advertising manager of the newspaper is afraid of radio. If all the time that is spent in nursing fear were devoted to studying the best methods of meeting new conditions and turning them to one's own use by co-operation, if competition won't work, and by liberal use of advertising, most of the nightmares would vanish."

"I often think of the advice of the trainer, when he felt that his man was nervous about going into the ring, 'remember that the other fellow is just as scared as you are and the man who first quaked before will score the knock-out.'"

Siam is developing its automobile roads through the jungles.

The United States has about 2,000 railroads.

Will Visit Churchill

Business Men Under Auspices of Canadian Chamber of Commerce To View Northern Activities

Churchill, Manitoba, once a lone trading post on Hudson Bay and now the scene of developments which will make it a great northern port, will be visited this fall by a large delegation of businessmen under the auspices of the Canadian chamber of commerce.

The chamber is completing plans for the trip which will be made just prior to its convention which will be held at Regina. On September 7 the party will leave Regina for the north, returning in five days' time after which the delegates, who will represent the 200 Canadian boards of trade and chambers of commerce from the Atlantic to the Pacific, will assemble at Regina for the annual convention.

Management of Yukon May Be Investigated

Administration Is Now Being Carried On By Canada

Administration of the Yukon territory now carried on by the Dominion, might be the subject of an investigation, Hon. T. G. Murphy, minister of the interior, said in the House of Commons. He was asked by Rt. Hon. Mackenzie King, Liberal leader, how long the Dominion would carry on the administration and bear the whole cost.

The population of the Yukon was given as 3,500, of whom 2,500 were white people. The House passed a vote of \$185,000 for the administration this year.

Transport Minerals By Air

First Shipment of Radium Ore From Great Bear Lake By Airplane This Month

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation. Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

World's Grain Exhibition

Space for National Exhibits Being Taken Up Very Rapidly

Space for national exhibits in the new World's Grain Exhibition and Conference building is being taken up very quickly, a large portion of the mile and one-half frontage for these exhibits having already been applied for. Dr. J. H. Grisdale, chair-reporter that up to date, over 30 agrarians of the program committee, cultural experts representing many countries will take part in the conference program of the World's Grain Show, 1932.

A Freakish Earthquake

There appears to have been something almost ludicrous about the earthquake that shook the Old Country. The only casualty was a canary, which suffered a broken wing, but the quake played havoc among the figures in Madame Tussaud's famous waxworks, tumbling together and smashing the images of criminals, jockeys, tennis players and less notable personages. The re-assembling of these parts will be a delicate piece of work.

The noblest study of mankind may be man, but his favorite study is woman.

Population Of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

Where Nightingales Are Considered a Nuisance

Inhabitants Of English Village Kept Awake By Songsters

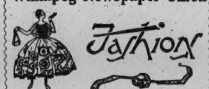

In all the world there is no song more beautiful than that of the nightingale; but the village of Merrow in Surrey, England, is so much patronized by the songsters this year that the inhabitants are beginning to speak of their "pest of nightingales."

Indeed, visitors have heard more than one person threaten to shoot the birds—if only they could catch them.

People living in the vicinity of Merrow Common, many of them land folk whose work calls them early from bed in the morning, are those who complain most bitterly. For as many as five and six nightingales tune up simultaneously between 10 and 11 o'clock each night.

"There were two singing one against the other in an elm tree just outside my window the other night, one male said 'and the din was so awful that I thought I might get some sleep in the back bedroom. But it was no better there, because another nightingale was singing in the pear tree in my garden.'"—London Morning Post, England.

(By Annette)

350 SIMPLE AND LOVELY—YOUTHFUL

Here is a blouse you'll love. It's not alone flattering and youthful but thoroughly wearable.

A dotted crepe silk made the original in white ground with skipper blue nickel sized dots. It's a combination that fits into many colour schemes. It's a type that may be worn with a suit or with a separate contrasting skirt or made as a complete frock worn with a matching skirt.

Net, eyelid batiste and lace are dainty suggestions.

Headkerchief linen, printed batiste, dotted awiss, pastel crepe silk and satin are ideally suited to this model.

Style No. 356 may be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

The 36-inch size requires 2 yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Willing To Take Chance

People are getting more air-minded every day, or maybe it's the unemployment situation. Fearing that no one would be on hand to leap from a balloon at the height of 1,500 feet, the Audubon Park Commission, New Orleans, advertised an offer of \$3 for every minute in the air. The advertisement was answered by 121 men.

The sun's temperature at its outer radiating surface is 6,000 degrees, absolute Centigrade scale.

The biggest population ever recorded for Great Britain—and the lowest birth rate in the last 50 years—are features of the preliminary report of the registrar-general, dealing particularly with England and Wales, following the census of April 28 last.

The population of Great Britain on census day was 44,790,485. The population of England and Wales 39,947,931, and of this figure there were 20,809,087 females to 19,138,844 males.

The total population rate—685 persons to the square mile—is higher than in any country recorded, with the probable exception of Belgium.

But the country now ranks lower than any other except Sweden in the birth rate. Births registered were 6,930,000, compared with 8,281,000 in the previous year.

"Despite the fact that the marriage rate has been well maintained, particularly at the younger ages at which the bulk of births occur," says the report, "and despite the further fact the exceptional post-war spurt in the birth rate itself had only just passed its maximum at the beginning of the decade, the total births registered are 1,250,000 fewer than in the preceding period, which covered the war years, when the birth rate sank to levels never before recorded."

"The full significance of the fall will be but dimly appreciated for many years. Any temporary satisfaction felt in the reduction of the number of unproductive mouths to be fed during the present period of economic stress must sooner or later be qualified by realization of the more profound secular issues involved."

As a partial set-off against the decline in births the deaths registered were more than 500,000 fewer than in either of the two preceding ten-year periods.

Trade Emporium In China

Novel Building To Be Opened In Shanghai This Year

One of the most novel modern buildings in China is to be opened in Shanghai this year. It is a trade emporium being erected by the Continental Bank of Shanghai, and occupies an entire block on Nanking Road. The building will be seven stories high, and will have four elevators in different parts. There also will be accommodations for a modern hotel, restaurants, offices and shops. To enable automobiles to reach any part of the building a "T" shaped lane will be constructed inside.

Works Both Ways

Idleness Is Bad For Sane As Well As Insane People

Idleness, says the physiologist, is bad for the insane. It is bad, too, we think, for the sane. Hard work may in some measure reclaim the insane or at least help them to justify their existence. But enforced idleness has a cruel trick of unbalancing minds that brood too deeply on the cares of this world; and before we reclaim the maimed minds of our race we should see to it that those who are still whole shall be kept whole to the end.

Not on the Program

"Rastus, I understand that you have become the father of twins." "Yassah! Ah done call the first one Adagio Allegro, and Ah'm goin' to call the second one Encore."

"Musical names, all right. But why do you call the second one Encore?" "Well, you see, he wasn't on the program at all!"

Marble buildings and statues of ancient Greece were not the white objects that they are sometimes thought to be, but were painted in bright, soft colours.

A California millionaire recently gave his friends a peacock dinner and the birds alone cost him \$4,000.

"I dream of you day and night, Miss Mimi."

"Ah, that is why you are always so sleepy."—Lustige Koelner Zeitung, Cologne.

10037—101A. Ave. Edmonton

Avondale.

A large crowd turned out to enjoy the social afternoon and take advantage of Dr. Greenberg's paper on first aid at Kings Park under the auspices of Avondale U.F.W.A. The quietness and good order of the people in attendance gave proof of the keen interest taken in this splendid and instructive paper which covered fully the many phases of first aid advice. The members have been receiving many thanks for bringing this valuable feature to the community but Avondale U.F.W.A. feel however, that all the thanks is due Dr. Greenberg who kindly gave so much of his valuable time in preparing a paper covering so many branches of first aid, the value of which cannot be estimated when accidents or acute sickness comes to people some miles away from professional attendants. The only regrets heard were that the listeners could not remember all the information given but we feel anyone part of the paper was well worth our attention.

B. Oldham took a truck load of friends and neighbors to Edmonton on Monday to attend the exhibition. Mr. and Mrs. G. Whiteley visited at Mr. Symons Sunday.

Doris Anderson expected to be out of the hospital on Sunday last after having had an operation for appendicitis. Mrs. S. Thomson is expected home this week but Doris will stay with friends in Edmonton for a while.

G. Arnold is leaving this week to consult Drs. Mayo at Rochester, Minnesota.

Mr. and Mrs. L. A. Scheelar and Irene, Buddy and Donald, moved from Salem, Oregon to visit with relatives and friends at Calgary, St. John's and Lloydminster. They spent Monday and Tuesday with J. U. Allen's. Mrs. Chase and Lloyd Allen of Strawberry Plains visited with the Scheelar family at J. U. Allen's.

Avondale Jr. U.F.A. met at Avondale School on July 14th for practice for a concert, several girls being absent due to the bad roads.

Meta Cooper is visiting at A. Craig's.

Ellsworth Allen had the misfortune to get his hand badly burned, Dr. Greenberg attending him.

Lucy Thomson is helping Mrs. Goodwin.

Mrs. Shotts and daughters returned from Vegreville on Saturday.

LOUGHEED.

La Rue Hainey returned from Metlakso Saturday night and will spend the holidays at home.

The Misses Muriel and Edith Bullock of Leduc were holidaying at the home of their uncle, Mr. and Mrs. T. Bullock.

Mr. L. R. Metcalf of Delburne was in town Saturday, he has rented the house recently vacated by K. Tookey and will be the principal of the local High School.

It is rumored that Grade XII is to be taught this term, which will be a great benefit to the older students.

On Saturday the Women's Institute met at the home of Mrs. R. E. Maccracken. The main feature of the meeting was the report of the recent W. I. Convention, by the delegate Mrs. A. Chamberlin. Mrs. E. Probit and Mrs. Maccracken were chosen delegates to the W. I. Convention to be held at Viking, July 29th. Plans were also made to hold a picnic sometime during August and to have as their guests the Women's Institute Girls Club.

At the close of the meeting the hostess served a dainty lunch.

Mr. and Mrs. K. Tookey departed for Edmonton Thursday, where they will make their future home. Mr. Tookey was principal of the local school while Mrs. Tookey (nee M. Edna Winter) also taught here several years. We are very sorry to lose this prominent couple but wish them much success in their new location.

On Friday evening Rev. and Mrs. Fowler held a social evening at their home for the Young People's Society of the Nazarene Church. The hours were spent in games, community singing, and a good program was given by the members. At the midnight hour the hostess served a sumptuous lunch.

Wednesday, July 29th, is set aside for the Annual Old Time's Picnic at the Hardisty Lake. A large crowd is expected to be present. It is reported that seven quarters of Buffalo will be roasted this year, when other years only two were supplied.

Miss Mae MacDonald returned from Edmonton last week where she has been visiting with her sister, Mrs. R. Barotte of the Hazelwood district.

With the recent rains the crops are looking well and the garden vegetables are improving, after the cutworm menace and the early drought.

"Buster" Brown is holidaying in the city.

Miss R. I. Paul is visiting with her sister, Bessie at Strone.

Here and There

Over 1,600,000 lbs. of salmon were caught in the coastal waters and rivers of Quebec last year, or 615,000 lbs. more than in 1929.

Potato shipments from Halifax are now over for the season and have been declared to be the biggest in the history of the port.

Illustrating the growth of tourist travel into Canada, 93,509 foreign cars entered Canada in 1929, while in 1930 the total was 5,409,458.

At the end of February of this year, official registration of radio sets in Canada totaled 595,758, an increase of \$1,512 over the similar period of last year.

Cadmium, a by-product obtained in the production of zinc, was produced for the first time in Canada early in 1923 at Trail, B.C. Used for plating purposes demand for it has increased very rapidly.

The Province of New Brunswick's largest bond issue was sold at the most favorable price in 25 years. A bid of 98.43 was accepted for \$5,215,000 4 1/2 per cent. 30-year bond issue, making the interest cost to the province 4.52 per cent.

New bridges to span the St. Lawrence and other rivers are to be built by the Quebec Government this year at a cost of \$8,000,000. They will be built at points that will link up the highways in the province into a whole.

First large cattle consignment to move east since November, 15 cars or 322 head of cattle for export to Great Britain, left Winnipeg by special Canadian Pacific train which totalled 37 cars of stock, including 22 cars for eastern Canada points.

A single British Columbia Sitka spruce may contain 8,000 to 10,000 feet board measure of lumber. Lumber used in building an ordinary five-or-six-roomed frame house is estimated at 15,000 feet, hence two good-sized Sitka spruce trees would suffice for the house.

Crowds estimated at 500,000 people watched the Empress of Britain sail down the Clyde from her birthplace at Clydebank to undergo trials. The ship was escorted by six tugs, a police launch and six airplanes. This 415,000-ton ship was built for a speed of 24 knots and has already done 26 knots in preliminary trials.

Ten minutes terminal stop at St. Ignace, Ont. and a chance greeting between G. C. Hay and William Ardell, Canadian Arctic mechanic, spanned 45 years of separating and silence between Ardell and his family. It appeared in conversation that Hay was Ardell's nephew and the latter will now visit his family in Vancouver where he has "not seen for nearly half-a-century."

The Bay of Fundy steamer Princess Helene will have her first summer season this year and with the opening in June of the Lake-side Inn, new C. P. R. hotel at Yarmouth, heavy tourist traffic is looked for through Saint John from both the United States and Canada. The Cornwallis Inn at Kentville and the Pines at Digby will also attract a large influx of visitors. (231)

Nowadays the world moves on rubber and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria in June bought 20 pairs of shoes with rubber soles from Canada. Barbados took 2,629 pairs and Trinidad 6,555 pairs. In June the export of Canadian automobile tires exceeded \$1,000,000 in value.

Canadian farmers are now producing all the fine tobacco required by Canadian manufacturers, according to a statement just issued by the Dominion Department of Agriculture which also claims that the tobacco is of better quality than that usually imported. Canadian tobacco has also become a factor in the British tobacco market.

An increase of 58% in motor tourist traffic from the United States to New Brunswick is shown in statistics for the 1930 season up to July 31 as compared with the same period last year, according to figures issued by the provincial government Bureau of Information and Tourist Travel from returns from Canadian Customs collectors at the 24 ports of entry along the International Boundary.

It is not generally known that the Prairie Provinces — Manitoba, Saskatchewan and Alberta — contain important commercial fisheries. In 1929 the commercial value of fish caught in these provinces exceeded \$1,000,000.

Herman Trelle, of Wembley, Alberta, former wheat and oats raiser, won first prizes at the Regina Exhibition for his Marquis and Reward wheats. William Darnborough, of Laura, Sask., was second in the Marquis class, and E. Thomson, of Pathow, Sask., came just behind Trelle in the Reward class.

On Wednesday, July 15th, the Lougheed Elks are to hold a Horse-shoe and Soft Ball Tournament on the sports ground. The admission is to be 25c for horse shoe players, and 10c for Soft Ball players. The proceeds to go towards the Kiddies Day entertainment to be held at a future date. In the evening a Big Monte Carlo and Dance will bring the day to a climax.

"Ah, a new face," remarked the Sunday School teacher at a local church here as he placed his hand on the head of a small boy stranger. "No, it ain't," replied the boy, "It's just been washed, that's all."

"That tenor has a wonderful voice. He can hold one of his notes for half a minute," said a guest at a musicale in Tofield. "That's nothing," replied a local banker of the city, "I've held one of his notes for two years."

Here and There

Feeding tobacco to sheep is the latest device to check internal parasites. The tobacco is given with salt in the proportion of ten pounds of salt to one of crushed tobacco leaf.

Latest available estimates place Canada's forest resources at 224,304 million cubic feet of standing timber, capable of yielding 421,637 million feet board measure of lumber, 1,100 buyers came to the sale and of pulpwood, ties, poles and other smaller materials.

Western Canadians are showing resolution coupled with a high degree of industry in the comment made by Grant Hall, vice-president, Canadian Pacific Railway, on his return from a recent tour of the company's western lines.

"Trail riding in the Canadian Rockies has made a strong appeal to Lord Duncannon, son of His Excellency the Governor-General, who with the Hon. Arthur Ponsonby and Major Dollan have been staying at the Banff Springs Hotel.

Intensive campaigns against grasshoppers, wireworms, wheat stem sawfly, cutworm, potato beetle, cabbage butterfly, root maggots are being conducted throughout the west this summer and fall with a special organization in the field.

"Buyers' Week," which has been a great success in the past, will be held for the fourth time in Montreal commencing August 10 next. At the last one in February upwards of 1,100 buyers came to Montreal and purchased in round figures \$950,000 worth of Canadian-made goods.

A man catching a fish is not news unless the fish is an outsize, but a fish catching a man rates a big type head. This happened at Lake Minnewanka, near Banff, recently when an angler was pulled off the pier into the lake by the sudden strike of a monster trout. Constable James of Calgary put off in a boat and landed both fish and fisherman.

Six days, nine hours and eleven minutes was the time of the record run of the "Empress of Japan," 26,000-ton flagships the Canadian Pacific fleet, on her last trip from Yokohama to Honolulu, while a double record was made when the same ship completed the voyage from Honolulu to Victoria in four days, nine hours and 16 minutes.

For the second time in the past three years, Canadian Pacific Railway police are all-Canada revolver champions. The railway's Ontario team defeated the Royal Canadian Mounted Police of Lehigh, in the finals for the trophy recently. The railway police scored 1410 out of a possible 1500 against the Mounties 1322 thus becoming Dominion Open Revolver Police Champions.

Hon. Gordon S. Harrington, Premier of Nova Scotia, and two hundred of the province's leading citizens, gathered at Yarmouth June 16 for the opening of the Lakeside Inn, Canadian Pacific hotel. This hostelry is the third of a chain across Nova Scotia owned by the railway in the east. The sanatorium, testifying to the faith in the tourist possibilities of the province held by the Canadian Pacific. (748)

F. Hedley Auld

MR. F. HEDLEY AULD, Deputy Minister of Agriculture for Saskatchewan, is chairman of the Exhibition Committee of the World's Grain Exhibition and Conference and, like many other prominent westerners, was born in Prince Edward Island. He came to the West some twenty-eight years ago and in 1906 joined the Dominion Department of Agriculture, becoming associated with W. A. Wilson in the dairy branch.

A year later Mr. Auld organized the statistical bureau of the Provincial Department of Agriculture and afterwards went to Saskatoon to take charge of the agricultural extension work of the University. For a short time he was a member of the Mooney Seed Company and in 1914 returned to the Provincial Department of Agriculture, organizing the debt adjustment bureau. In 1916, when the late Frank Mantle, then Deputy Minister of Agriculture, went overseas, Mr. Auld became acting deputy and deputy upon the death of Mr. Mantle.

For the past two years, Mr. Auld has been president of the Regina Provincial Exhibition Association. In 1928 Mr. Auld was secretary of the Royal Grain Inquiry Commission. He is a director of the Regina Y.M.C.A. and has membership in the Canadian Society of Technical Agriculturists, the Saskatchewan Live Stock Board, and the Saskatchewan Stallion Board.

—The Passing Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Displays of 260 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviatrix who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Laue Koch Arctic Expedition, who became violently demoralized when he saw his first movie at Thorshavn, Faroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entree dishes. The gift was in recognition of his 61st birthday.

In front of the Australian commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan of British Columbia during the past year. Prices ranged from \$80 an acre for raw land to \$750 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marshal Joffre reformed the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white sheep, black sheep, Mary's little lamb, and hydraulic rams, was certainly not a true son of the soil.

"In conclusion, I would plead as an extenuating circumstance the absolute innocence of the accused!"—Soudanais-Sirig, Stockholm.

A SMART SLIP THAT ACCENTUATES SLIMNESS

It's the new wrap-around slip that follows the shaping of the figure.

It's made from a length of material.

No seams to cause conflicting lines to the outer garment.

The wrapped arrangement makes it shadow proof.

The selvedge edge of the material makes a smart neat finish for the lower edge of the slip.

The side edges of the slip may be finished with a picot edge or rolled in hem. This is about all the sewing required to make it, save for a few darts through the bodice, and to tack the shoulder straps in place.

It's straight from Paris!

You'll be thrilled with the easy manner in which it is made.

It will make an excellent Xmas gift.

The back, too, has perforations for deep V for evening wear. The upper and lower edge may be trimmed with lace.

Crepe de chine, crepe satin and flat crepe are popularly used.

Style No. 900 may be had in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Size 16 requires 1 1/2 yards 39-inch.

Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Of London's foreign population 34 per cent. are Russians, 10 per cent. Italians, eight per cent. Germans, and seven per cent. French. There are about 40,000 Russians.

Cunard Week-End Cruises

Something New In the Line Of Ocean Travel

A pioneer steamship company for the past 91 years, the Cunard Line came to the front this year with something new in the line of ocean travel: the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 400 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Cunard, founder of the line which bears his name.

The Cunard week-end cruises are made by the line's express steamers, the "Berengaria," "Aquitania," and "Mauretania," among the largest and finest ships in the world.

These liners steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: "Everything!" People play the regular deck games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horse race on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying prone on the hatch tops or take sun baths in deck chairs; they loiter about in bathing and various kinds of sport suits, the girls displaying many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing here all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. "There always reminds me of Columbus when the first land loomed up in the West Indies."

Returning from a cruise a great crowd moves to the rail to note the arrival of the Sandy Hook pilot, in his little rowboat, looking like a chip alongside the huge liner. At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

Fruit Market in China

Fruit shippers of the Okanagan show much interest in the statement of Col. L. M. Cosgrave, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price. The subject was brought up at two meetings in Vancouver addressed by Colonel Cosgrave.

Edmonton a City Of Homes

Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 new dwellings a year, it is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including repairs and additions, figures at about \$8,000,000.

Buried Treasure

Party of Vancouver Men Will Sail To Cocos Island In Search of Hidden Wealth

Lured by legendary tales of fabulous treasure buried by pirates of olden days, a party of Vancouver men, headed by Col. J. E. Leckie, will sail for Cocos Island, 500 miles off the coast of Costa Rica.

It is popularly supposed that more than 300 tons of treasure, valued at \$60,000,000, is hidden on Cocos Island, buried there by Thompson, Davis and other famous pirates of early days. Wealthy citizens of Peru are also said to have hidden their gold and jewels there during the revolution of 1853.

Three other British Columbia expeditions have searched for treasure on Cocos Island, one in 1892; on the Eliza Edwards, under command of Capt. F. S. MacKenzie, of Vancouver; another in 1905, from Victoria, and a third in 1924.

Sir Malcolm Campbell, world's auto speed record holder, announced recently that he will make another voyage to Cocos Island this summer. He is reported to be outfitting an expedition in England now.

Col. Leckie's party will sail direct to Costa Rica, where eight Costa Rican soldiers and an officer to guard the interests of the state will join the expedition. Cocos Island is owned by Costa Rica and the state will claim one-third of whatever treasure is found.

Keeps Editors In Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1930 by the Lake Erie and St. Clair Pulp Mills' Association. At that time Hugh Savage, of Dundas, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usages.

Goods Had Vanished

Ice Melted While Customs Officials Debated on Classification

It is only within the last century, says the Manchester Guardian, that we have learned to temper summer heat—when we get it—with cold drinks. The first cargo of summer ice brought to this country was shipped from Norway, and it arrived in the Thames in June, 1822. The customs officials had to deliberate long and earnestly as to the heading under which it should be classified for duty. When at length they decided to list it as "dry goods" the entire cargo of 300 tons was found to have melted.

Sponsor Withdraws Bill

Proposed Amendment Dealing With N.S.F. Cheques Is Dropped

On the suggestion of Hon. Hugh Guthrie, minister of justice, the bill of A. W. Neill (Ind., Comox-Alberni), dealing with cheques issued without funds was dropped by its sponsor in the House of Commons. In brief the proposed amendment provided that if cheques issued with no funds or insufficient funds in the bank were not honored within a reasonable time the issuer would be liable for the first offence to a fine not exceeding \$100 or three months' imprisonment, and to \$200 fine or six months' imprisonment for a subsequent offence.

Certain amendments would be introduced to this session to the criminal code, Mr. Guthrie stated, and consideration would be given to the bill that Mr. Neill really had in mind. "The view I take," the minister of justice stated in speaking of the measure presented, "is that the proposed amendment would open the door to issuers of worthless cheques." Under the bill the issuer would not be liable unless he failed within a reasonable time to pay the amount.

New Senators Appointed

Patrick Burns, Of Calgary, Alberta, Named a Member Of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur Marcotte, K.C., Ponteix, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lessard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turritt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

Introduced Amendment To Companies' Act

Bill Aims To Aid Employers In Purchasing Homes

Amending the Companies Act so as to enable a company to make loans to its employees, for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. C. H. Cahan, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Teacher—Rollo, what is jam?

Rollo—Jam is what causes bread to taste not so nice when there's none on it.

Another Notable Flight

Captain Hawks Makes Remarkable Time In Eastern Canada Hop

Quebec, Montreal, Toronto and Ottawa were drawn closer together by a series of sensational flying performances of Captain Frank M. Hawks, famous United States speed pilot.

Montreal is no more than 32 minutes from Ottawa; 48 minutes from Quebec, and 108 minutes from Toronto, while the capital and Toronto are only 70 minutes apart. These were the times taken by Hawks and his monoplane in a flight from Quebec to Montreal, then on to Toronto, and back to Montreal via Ottawa. Several of these times were hailed as new records.

Hawks flew from Quebec to Montreal where he enjoyed breakfast, Ottawa as guest of Hon. Hanford took luncheon in Toronto, tea in and was back in Montreal to be MacNider, United States minister, guest of the Montreal Light Aero-plane Club at dinner.

Altogether Captain Hawks was in the air four hours, 18 minutes and during that time covered an air distance of approximately 850 miles, averaging 197.6 miles per hour. The achievement rivals in some measure the notable recent flight of Captain Hawks from Paris to London, on to Berlin and back to Paris in a single day; the flight that took him from London to Rome and back in a single day.

Research Grants

Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

Onion Diet For Sheep

Sheep flocks on Colorado's western slope have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sacks of onions have been given sheep owners, as there has been no market for them.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

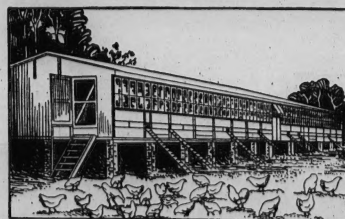

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Horace A. Craig

MR. CRAIG, the vice-chairman of the Alberta Committee of the World's Grain Exhibition and Conference, is Deputy Minister of Agriculture for Alberta.

Born at North Gower, Ontario, in 1882, Mr. Craig received his education in the public and high schools of that Province; at the Ontario Agricultural College and the University of Toronto. In 1906 he was awarded a B.S.A. degree.

From 1906 to 1911 Mr. Craig was superintendent of fairs and institutes for the Province of Alberta, and from 1911 to 1916 superintendent of provincial fairs. He was appointed to the position of Deputy Minister of Agriculture in 1915.

Mr. Craig is a member of the Canadian Society of Technical Agriculturists, as well as of numerous organizations interested in agricultural problems.

Main Street

Rev. Huestus and wife of Wainwright accompanied by Miss Howard of Vancouver were visiting at the Manse Tuesday.

Mr. A. C. Carbol has moved his garage to the corner north of his former location and intends grading the approach and decorating the front of the building.

Mr. Geo. Wilbraham, of Drumheller, is visiting his son Charles at Irma.

Miss Stewart, teacher in the Irma School is spending part of her holiday at Banff.

Mrs. Chas. Wilbraham and children are visiting friends at Calgary.

The Headley block is nearing completion, the plastering is well under way and some of the new stores should be ready for occupation by the end of the month.

Mrs. Greenberg has been enjoying the pleasure of a visit of her sister from Vegreville.

Mr. A. E. Foxwell, the local butcher at Irma has taken over the shipping of live stock for the Live stock association at Irma.

Mr. F. Peterson is in Southern Alberta gathering specimens of grain and grasses for the Provincial Government.

Mr. and Mrs. Geo. Tripp are spending a holiday at Banff and other Alberta and B. C. points.

Mr. and Mrs. Howard Peterson and Mr. and Mrs. Darrol Peterson are visiting friends in the Carstairs district.

The Halverson brothers of Alask, Saskatchewan have been visiting with the Knudson's in the Coal Springs District.

Mrs. M. T. Knudson is visiting with friends at Edmonton.

Mrs. H. W. Love has been spending a few days in the City.

Quite a number of Irma citizens have been taking in the fair at Edmonton.

Mr. and Mrs. Percy Jones were in Edmonton this week.

Mr. J. G. Clark is visiting his daughter Mrs. Graham at Fernie, B. C.

Owing to the wet weather Wednesday the Orangemen cancelled their trip to Ribstone.

IRMA BRANCH CANADIAN LEGION B.E.S.L.

The postponed executive meeting of above branch was held on Saturday, July 11th.

The reports of all committees was heard on the picnic, and, from the reports heard and accepted, we are in for a big day, weather permitting, finishing up with a soft ball game between the Irma Ladies team and members of the Canadian Legion.

W. E. Inklin, Sec.-Treas.

PUBLIC NOTICE

IN THE ESTATE OF NORMAN VICTOR KING, late of Fabyan, in the Province of Alberta, Farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Norman Victor King, deceased, who died on the 13th day of May, 1930, are required to file with the undersigned Solicitor for the Executrix, at Wainwright, Alberta, by the 21st day of September, A. D. 1931, a full statement, duly verified of their claims and of any securities held by them; and after that date the Executrix will distribute the Estate of the said Norman Victor King among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her knowledge.

DATED the 15th day of July, A.D. 1931.

M. G. Cardell, Wainwright, Alta.
Solicitor for the Executrix.

BOYS' CAMP

A truckload of boys from Irma left on Wednesday for the district Camp at Camp Lake near Kinsella. In spite of the muddy roads, all arrived O.K. thanks largely to their energetic truck driver, Mr. George Dawson. There, along with many other boys from several towns along the line, they plan to have a week's real enjoyment. The boys who went are as follows: Bob McGuire, Harold Barber, Ray Locke, Ralph Skonert, William Milburn, Roy Latner, Stewart Fenton, Dolton Herbert, Jack Peterson and Albert Glasgow. The boys wish to thank all those who helped to get them to camp either with subscriptions or services.

New Lakeside Inn is Opened

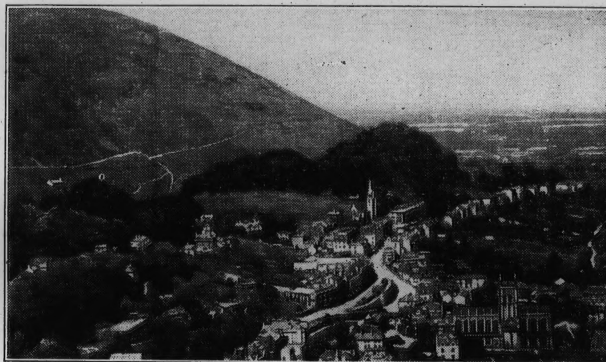

Beautifully set in one of the most picturesque sections of Nova Scotia, combining marine and landscape vistas which bid fair to bring it fast into line of popularity with its sisters at Digby and Kentville, the new Lakeside Inn, at Yarmouth, N.S., was formally opened on June 15, as the newest link in the Canadian Pacific Railway's great chain of hosteleries from Atlantic to Pacific. Readily accessible from Saint John, through Digby, via the

luxurious steamer "Princess Helene", from Halifax, over the Dominion Atlantic Railway; and direct from New York, Boston and Portland by Eastern Steamship Lines, the town of Yarmouth and its new hotel are destined to play an important role in tourist traffic to Nova Scotia, with its famed Annapolis Valley and historic Land of Evangeline. Sport and recreations are plentiful and varied. Canoeing, tennis, fishing, swimming and innumerable at-

tractive excursions are only a few of the offerings. There is good golf available near Yarmouth and the hotel and its cottages form a comfortable base of operations. Taste and comfort have been skillfully combined in its spacious public rooms, broad verandahs and airy bedrooms. Its cuisine and service are conducted on the established standards, known to guests of the company throughout Canada.

Malvern Calls To Drama-Lovers

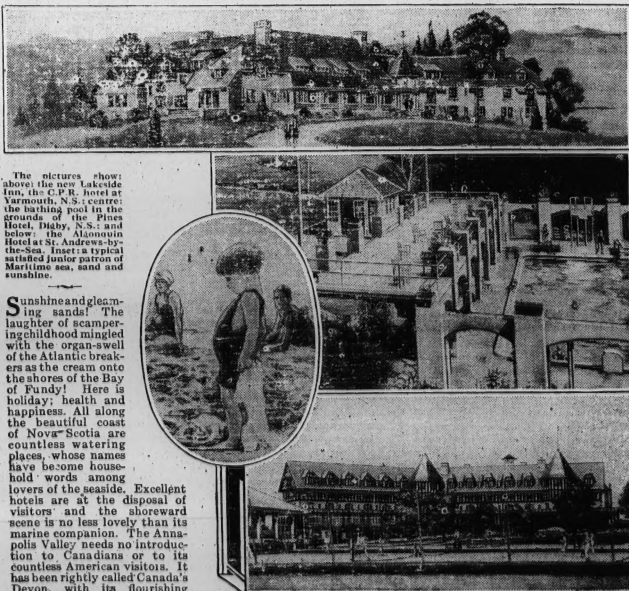

As Malvern's beacon, blazed forth the news of the Armada over the entire West Country, so from the little English town, nestled among the Worcestershire hills, hard against the Welsh border, word goes forth today of the keeping alive of the spark of the English drama, faithfully from year to year, by means of the town's Annual Festival. Under the direction of Sir Barry Jackson, this event has become a national institution, even as its companion festival at

Shakespeare's immortal Stratford-upon-Avon. This year's program includes known and unknown English productions dating from 1513 to 1931 and is dedicated to George Bernard Shaw, to whom Sir Barry is looking to produce a new play, as the principal item of the bill, as he did "The Apple Cart", at the original Malvern Festival. The festival runs from August 3 to 22, inclusive, consisting of three repeated weeks of plays and a series of lectures by well-known authorities. Malvern is only 128 miles from London, but Gloucester and Worcester, both cities of considerable size and offering first-class hotels, are within easy reach. The town itself is also making special arrangements for the comfort of visitors during festival time. In addition to this the whole section of England is studded with villages and small towns with

good accommodation for travellers, and is criss-crossed with railways and excellent automobile roads, in scenery of unsurpassed splendor. Sailings of the Canadian Pacific's "Empresses" and "Duchesses", from Quebec to Southampton and Montreal to Liverpool, respectively, make excellent connections with the various weeks of the festival at Malvern, and will include the palatial new "Empress of Britain", the biggest and fastest ship in service between British Empire ports.

SUMMER IN THE MARITIMES

The pictures show above the new Lakeside Inn, the C.P.R. hotel at Yarmouth, N.S.; centre, the bathhouse at the grounds of the Pines Hotel, Digby, N.S.; and below, the Algonquin Hotel at St. Andrews-by-the-Sea. Inset is a typical fortified junior pattern of Maritime sea, sand and sunshine.

Sunshine and gleaming sands! The laughter of scampering childhood mingled with the organ-swell of the Atlantic breakers as the cream onto the shores of the Bay of Fundy! Here is holiday, health and happiness. All along the beautiful coast of Nova Scotia are countless watering places, whose names have become household words among lovers of the seaside. Excellent hotels are at the disposal of visitors and the shoreward scene is no less lovely than its marine companion. The Annapolis Valley needs no introduction to Canadians or to its countless American visitors. It has been rightly called Canada's Devon, with its flourishing orchards and pasture lands and its countless picturesque farms and hamlets. A few hours' journey by palatial steamer from Saint John, N.B., Digby, with its Pines Hotel as the hub of activity, rivals Kentville with its Cornwallis Inn, and Yarmouth with its new Lakeside Inn, in extending hospitality to the holiday-maker. Golf, tennis, bathing, fishing, yachting and innumerable beautiful motor drives are only a few of the recreations available. On the New Brunswick mainland, farther, as it were, to this staid family, the Algonquin Hotel, at St. Andrews-by-the-Sea, sets a standard of summering unrivalled anywhere on the continent. The luxurious hotel, with its many attached cottages, is the centre of one of the most exclusive colonies of the Dominion. The golf links, known throughout the length and breadth of the country as one of the finest championship courses available, are meet namesake of the home of the royal and ancient game in old Scotland. The Canadian Pacific Railway places all these resorts within easy access of their many devotees.
